TITLE

Import Health Standard: Zoo Crocodilia and Zoo Crocodilia Hatching Eggs

COMMENCEMENT

This Import Health Standard comes into force on [Effective Date]

REVOCATION

This Import Health Standard revokes and replaces the following:

- a) *Import Health Standard for Zoo Crocodilia from Australia, ZOOCRANIC.AUS, 21 April 2008*
- b) *Import Health Standard for Zoo Crocodilia Hatching Eggs from Australia, ZOOCREGIC.AUS, 21 April 2008*

ISSUING AUTHORITY

This Import Health Standard is issued under section 24A of the Biosecurity Act 1993.

Dated at Wellington, [Document Date]

Introduction

This introduction is not part of the Import Health Standard (IHS), but is intended to indicate its general effect.

Purpose

This IHS specifies the minimum requirements that must be met when importing animals and hatching eggs of the order crocodilia into zoo containment in New Zealand.

The biosecurity risk organisms associated with the crocodilians that are managed by this IHS are (refer to Part 2 for specified requirements):

- a) *Edwardsiella tarda*
- b) *Amblyomma* spp
- c) *Placobdelloides stellapapillosa*

Background

The Biosecurity Act 1993 (the Act) provides the legal basis for excluding, eradicating and effectively managing pests and unwanted organisms.

Import health standards issued under the Act set out requirements to be met to effectively manage biosecurity risks associated with importing goods. They include requirements that must be met in the exporting country, during transit, and before biosecurity clearance can be given.

Guidance boxes are included within this IHS for explanatory purposes. The guidance included in these boxes is for information only and has no legal effect.

Who should read this Import Health Standard?

This IHS should be read by importers of zoo crocodilia and zoo crocodilia hatching eggs from the European Union (EU), Australia, Indonesia, Malaysia, Papua New Guinea, Singapore and Thailand.

Why is this important?

It is the importer's responsibility to ensure the requirements of this IHS are met. Consignments that do not comply with the requirements of this IHS may not be cleared for entry into New Zealand and/or further information may be sought from importers. Consignments that do not comply with the requirements of this IHS may be re-shipped or destroyed under the Act or tested/treated in accordance with this IHS prior to release or equivalence determined. Importers are liable for all associated expenses.

The costs to MPI in performing functions relating to the importation of zoo crocodilians and zoo crocodilian hatching eggs will be recovered in accordance with the Act and any regulations made under the Act. All costs involved with documentation, transport, storage and obtaining a biosecurity clearance must be covered by the importer or agent.

Equivalence

The Chief Technical Officer (CTO) may issue a direction under section 27(1)(d) of the Act that measures different from those set out in this IHS may be applied to effectively manage risks associated with the importation of these goods.

If an equivalent measure is approved, an import permit may be issued under section 24D(2) of the Act if the Director-General considers it appropriate to do so. The details of the CTO direction on equivalence will be included as notes in the special conditions section of the permit to inform the inspector's assessment of the commodity.

MPI's preference is that the exporting country's Competent Authority makes equivalence requests.

Equivalence requests can be lodged with animal.imports@mpi.govt.nz.

Transitional facility

Any containers not intact on arrival will be required to be made secure before the consignment is moved to the transitional or containment facility. Any material which has leaked from the container will be destroyed at the port of entry.

Biosecurity authorisation

A biosecurity authorisation may be given, by an Official Veterinarian, under section 25 of the Act, authorising direction of the zoo crocodilians or their hatching eggs to the transitional facility named on the MPI import permit.

Inspection

On arrival, all documentation accompanying the consignment will be verified by an inspector.

Document History

Refer to Schedule 1.

Other information

This is not an exhaustive list of compliance requirements and it is the importer's responsibility to be familiar with and comply with all New Zealand laws.

Import Health Standards

Other relevant IHSs must also be complied with before biosecurity clearance will be issued. These may include but are not limited to the following:

- a) All equipment entering New Zealand with the zoo crocodilians or zoo crocodilian hatching eggs must comply with the *IHS Used Equipment Associated with Animals or Water*.
- b) Containers made of timber must meet the requirements of the following: *IHS: Woodware from All Countries*.

CITES

It is the responsibility of the importer to ensure that the consignment is accompanied by any permit(s) required to meet the legislation of the country of origin and the Convention on the International Trade in Endangered Species (CITES) <http://www.cites.org>. See the Department of Conservation for further details <http://www.doc.govt.nz/about-doc/role/international/endangered-species/>.

The importer is advised to clarify the status of the species of animal in relation to international agreements on their trade, prior to export. Material arriving in New Zealand without the relevant CITES permits may be subject to seizure by the New Zealand Department of Conservation.

Any requirement for CITES or other conservation-related documentation must be met by the exporter/importer.

Environmental Protection Authority (EPA) and new organisms

Importers of new organisms must meet all requirements of the Hazardous Substances and New Organisms (HSNO) Act 1996.

Before an inspector can authorise a new organism to go to a containment facility, the EPA must have given approval for importation of that organism into containment in accordance with the HSNO Act.

Harmonised System (HS) Codes

The harmonised system is an international product numbering classification developed by the World Customs Organisation (WCO). The New Zealand harmonised system is found here: <http://aria.stats.govt.nz/aria/>

Animals imported using this IHS will be under one of the following HS Codes:

HS Code	Commodity Description
0106.20	Reptiles; live (including snakes and turtles)

Part 1: Requirements

1.1 Application

- (1) This IHS applies to imports of captive crocodylians and crocodylian hatching eggs from the European Union (EU), Australia, Indonesia, Malaysia, Papua New Guinea, Singapore and Thailand.

Guidance

- Only crocodylians with a containment approval from the EPA may be imported under this IHS.

1.2 Incorporation by reference

- (1) The following international standards are incorporated by reference in this IHS under section 142M of the Act:
 - a) The *International Air Transport Association (IATA) Live Animals Regulations (LAR)*: a copy is available for reading, free of charge, at MPI.
 - b) The *Australian Marine Orders Part 43, Issue 6* (equivalent to the *New Zealand Marine Rules Part 24C*), available free of charge: <http://www.comlaw.gov.au/Details/F2006L03643>.
- (2) The following material is incorporated by reference in this IHS under section 142M of the Act:
 - a) *MPI Approved Diagnostic Tests, Vaccines, Treatments and Post-arrival Testing Laboratories for Animal Import Health Standards (MPI-STD-TVTL)*.
- (3) Under section 142O(3) of the Act it is declared that section 142O(1) does not apply. That is, a notice under section 142O(2) of the Act is not required to be published before material that amends or replaces the standards, guideline or lists incorporated under clauses 1.2(1) and (2) above has legal effect as part of this IHS.

Guidance

- Incorporation by reference means that standards, guidelines or lists are incorporated into the IHS and they form part of the requirements
- Where the IHS states that section 142O(1) of the Act does not apply, this means that importers need to refer to the most recent version of any standard, guidelines or lists that are incorporated by reference in the IHS.

1.3 Definitions

- (1) For the purposes of this IHS and the associated guidance, terms used that are defined in the Act have the meanings set out there. The Act is available at <http://www.legislation.govt.nz/>.
- (2) See Schedule 2 for additional definitions that apply.

1.4 General requirements for import

- (1) In order to obtain authorisation into zoo containment each crocodylian must:
 - a) Have been hatched and reared in captivity and originate from a country that the CTO is satisfied meets the exporting country's system.
 - b) Have been monitored so that incidents of disease were identified promptly while in captivity.

- c) Be identified by a microchip prior to export. The identification number must be shown on the veterinary certificate accompanying the crocodylians.
 - d) Meet the requirements of clauses 1.5-1.7 of *Part 1: Requirements*.
 - e) Meet the specified requirements of *Part 2: Specified Requirements for Identified Risk Organisms* of this IHS.
 - f) Be accompanied by a veterinary certificate that meets the requirements of clause 1.9.2.
 - g) Be directed to an MPI-approved transitional facility.
- (2) In order to obtain authorisation into zoo containment, each zoo crocodylian hatching egg must:
- a) Be derived from crocodylians that have been hatched and reared in captivity, from a country that the CTO is satisfied meets the exporting country's system.
 - b) Be derived from crocodylians that were monitored so that incidents of diseases and death were identified promptly while in captivity.
 - c) Meet the specified requirements for identified risk organisms of *Part 2* of this IHS.
 - d) Be accompanied by an import permit required by clause 1.8 that meets the requirements of clause 1.9.1.
 - e) Be accompanied by a veterinary certificate as required by clause 1.9.2.
 - f) Be visibly clean and free from contamination.
 - g) Be directed to an MPI-approved transitional facility.

1.5 Pre-export isolation (PEI)

- (1) Crocodylians must be:
- a) Held in PEI premises for a minimum period of 30 days prior to the date of shipment.
 - b) Isolated from other animals not of equivalent health status.
 - c) Free from clinical signs of infectious disease for the entire PEI period.
- (2) The PEI premises must have been:
- a) Approved and supervised by an Official Veterinarian.
 - b) Maintained free from ticks and leeches.
- (3) Bedding used in PEI must be clean and free from evidence of contamination with ticks, leeches and seeds.
- (4) Each crocodylian must be identified and examined in the 3 days prior to leaving the PEI premises for the port of export, by a registered veterinarian overseeing the care of the animal in PEI. The crocodylian must be free from clinical evidence of infectious disease, external parasites (including ticks and leeches), plant and seed contamination, and be fit for travel.

1.6 Transport

- (1) In the case of transport by:
- a) Air: the transport facilities and arrangements must meet the relevant requirements published in the *IATA Live Animal Regulations*.
 - b) Sea: the transport facilities and arrangements must have been inspected and meet the requirements of the *Australian Marine Orders Part 43, Issue 6* (which is equivalent to the *New Zealand Marine Rules Part 24C*).
- (2) No animals other than those that meet the import requirements for entry into New Zealand are permitted to be transported with the zoo crocodylians or zoo crocodylian hatching eggs on the aircraft or ship.
- (3) Trans-shipment in any third country may not occur unless it is pre-approved by MPI and recorded on an import permit under section 24D

- (4) During transport to the port of departure and during transit to New Zealand, all bedding provided must be free from evidence of contamination with ticks, leeches and seeds.
- (5) Only sterilised peat, soft board or other approved inert products may be used as bedding.
- (6) The crates or pens used for transporting the zoo crocodylians or hatching eggs to New Zealand must be new or if previously used must be cleaned and disinfected by the Competent Authority of the exporting country.
- (7) Crocodylian hatching eggs must be packed to prevent spillage and placed into new or clean and disinfected containers in the presence of a government veterinary officer before dispatch.
- (8) The containers in which the crocodylian hatching eggs are transported must be sealed by an Official Veterinarian using seals bearing a unique mark or identification number.
- (9) For crocodylians and crocodylian hatching eggs transported by air, the cargo space of the aircraft where the animals are to be transported must be sprayed prior to departure with an insecticidal spray approved by the Competent Authority of the exporting country.

1.7 Import permit

- (1) An import permit under section 24D of the Act is required prior to the importation of consignments of zoo crocodylians and zoo crocodylian hatching eggs from the European Union (EU), Australia, Indonesia, Malaysia, Papua New Guinea, Singapore and Thailand.

1.8 The documentation that must accompany goods

- (1) The consignment must arrive in New Zealand with the documentation that is specified in, and meets the requirements of, clauses 1.8.1 to 1.8.2 below.
- (2) All documentation that is required by this clause 1.8 to accompany crocodylians and crocodylian hatching eggs must, unless otherwise stated:
 - a) Be original.
 - b) Accompany the imported goods.
 - c) Be in English or have an English translation that is clear and legible.
 - d) Be endorsed on every page by the Official Veterinarian with their original stamp, signature and date or be endorsed in the space allocated and all pages have paper based alternative security features.

Guidance

- Copies of all documents that are required to accompany the goods should be submitted to a NZ Official Veterinarian as early as possible to avoid delays in border clearance. The recommended timeframe is at least 7 working days in advance of arrival.
- Please email the applicable airport/port of arrival:
 - Auckland: liveanimalsauckland@mpi.govt.nz
 - Wellington: liveanimalswellington@mpi.govt.nz
 - Christchurch: liveanimalschristchurch@mpi.govt.nz

1.8.1 Import permit

An import permit (copy acceptable) is required under this IHS.

Guidance

- Application forms can be found on the MPI website at: [Live Animals into Containment or Transitional Facility](#)
- Completed applications need to be submitted to Animal Imports animal.imports@mpi.govt.nz
- The importer should complete all information requested on the application form.

1.8.2 Veterinary certificate

- (1) A veterinary certificate is required from the exporting country's Official Veterinarian. The veterinary certificate must include the following:
 - a) A unique consignment identifier.
 - b) The description, species, number of crocodylians or crocodylian hatching eggs and microchip identification for each animal.
 - c) Name and address of the importer (consignee) and exporter (consignor).
 - d) Name, signature and contact details of the Official Veterinarian.
 - e) Certification and endorsement by the Official Veterinarian that the general requirements outlined in *Part 1: Requirements* of this IHS have been met.
 - f) Certification and endorsement by the Official Veterinarian that the relevant requirements outlined in *Part 2: Specified Requirements for Identified Risk Organisms* of this IHS have been met.

Guidance

- A model veterinary certificate is located in *Part 3: Model Veterinary Certificates* of this document.

1.9 Transitional and containment facility

- (1) Following biosecurity authorisation being given under section 25 of the Act, the zoo crocodylians or zoo crocodylian hatching eggs must proceed directly to the transitional facility named on the import permit approved to [Facility Standard: Zoo Animals Transitional Facilities](#), using a transport method approved by the Official Veterinarian.
- (2) Zoo crocodylians must remain in the transitional facility for no less than 30 days.
- (3) Crocodylians must be inspected weekly by an MPI inspector and, if showing clinical signs, tested for *Edwardsiella tarda* using an MPI approved test.
- (4) The documentation must be checked to ensure it meets the requirements noted under general requirements in *Part 1* and specified requirements in *Part 2* of this IHS.
- (5) On satisfactory completion of the post arrival quarantine period, and providing that the documentation meets all the requirements of this IHS, an MPI Inspector will authorise the animals to be moved from the transitional facility to a containment facility, approved to the EPA [Standard for Zoo Containment Facilities](#).
- (6) The crates must be cleaned and disinfected. After completion of quarantine all feed, bedding material and faeces from the transitional facility and crate must be destroyed by an MPI-approved method.
- (7) The zoo crocodylians and their offspring must remain permanently in a containment facility and may only be transferred to another containment facility with the prior biosecurity authority given under section 29 of the Biosecurity Act 1993.

1.10 Transiting crocodylians

- (1) Crocodylians transiting through New Zealand must have, or be accompanied by:
 - a) An MPI transit permit.

- b) A contingency plan that has been pre-approved by MPI.
 - c) All the appropriate documents required by the final destination country.
 - d) Appropriate CITES documents issued by the exporting country for species that require such documents.
- (2) Crocodylians transiting through New Zealand must meet the requirements of *Part 1* and *Part 2* of this IHS.

Guidance

- For information on transiting please contact Animal Imports animal.imports@mpi.govt.nz

Draft for
Consultation

Part 2: Specified Requirements for Identified Risk Organisms

- (1) Crocodylians must comply with the following measures for identified risk organisms prior to import.

2.1 *Edwardsiella tarda*

- (1) Each crocodylian must be clinically healthy, and originate from premises that are under regular veterinary supervision; and follow a health monitoring programme including necropsies, and microbiological and parasitology testing.
- (2) Each crocodylian must be certified as originating from a captive zoo population in which no isolation of *Edwardsiella tarda* has occurred.
- (3) Each zoo crocodylian must undergo a thorough inspection and be found to be free from clinical signs of infectious disease and appear fit for travel within 3 days prior to import.
- (4) On arrival in New Zealand, crocodylians must remain in post arrival quarantine at a transitional facility approved to [Facility Standard: Zoo Animals Transitional Facilities](#) for a period of at least 30 days. During this time the crocodylians must be inspected weekly and subjected to MPI approved testing for *Edwardsiella tarda* if displaying clinical signs.

2.2 *Amblyomma* species

- (1) The PEI premises must be kept free of ticks, including any bedding or feed introduced during PEI.
- (2) Each crocodylian must undergo a thorough tick inspection within 3 days prior to departure.

2.3 *Placobdelloides stellapapillosa*

- (1) The PEI premises must be kept free of leeches including in any bedding or feed introduced during PEI.
- (2) Each zoo crocodylian must undergo a thorough inspection for leeches within 3 days prior to departure.

Part 3: Model Veterinary Certificates

Guidance

- The following model veterinary certificate is for crocodylians and crocodylian hatching eggs from, the European Union, Australia, Indonesia, Malaysia, Papua New Guinea, Singapore and Thailand.
- This models meets the requirements of the IHS.

Schedule 2 – Definitions

Competent Authority

The Veterinary or other Governmental Authority of an OIE Member, that has the responsibility and competence for ensuring or supervising the implementation of animal health and welfare measures, international veterinary certification and other standards and recommendations in the *Code* in the whole territory.

Director-General

The chief executive of the Ministry for Primary Industries.

EPA

Environmental Protection Authority.

European Union

European Union member countries.

IATA

The International Air Transport Association.

MPI

Ministry for Primary Industries, New Zealand.

Official Veterinarian

A veterinarian authorised by the Competent Authority of the country to perform certain designated official tasks associated with animal health and/or public health and inspections of commodities and, when appropriate, to certify in conformity with the provisions of the OIE *Code* Chapter for certification procedures.

OIE

The World Organisation for Animal Health.

PEI

Pre-export isolation.

Surveillance

The systematic ongoing collection, collation, and analysis of information related to animal health and the timely dissemination of information to those who need to know so that action can be taken.

Veterinary Certificate

A certificate, issued in conformity with the provisions of the *Code* Chapter for certification procedures, describing the animal health and/or public health requirements which are fulfilled by the exported commodities.

Zoo

A containment facility approved to the containment standard where live zoo animals are kept for the purposes of public exhibition, conservation, research or education.

Note: A zoo includes for example, a circus, butterfly house, aquarium or an oceanarium.

Zoo Animal

A new organism approved under the Hazardous Substances and New Organism Act 1996 (HSNO) to be held in a zoo. The organism is both a new organism under the HSNO Act and a restricted organism under the Biosecurity Act 1993.
