

Statistical Release

HIGHLIGHTS

- › Total forestry export earnings decreased by NZ\$ 56.1 million (4.9 percent) to NZ\$ 1100 million in the December 2011 quarter. An oversupply of logs in Chinese ports resulted in a fall in forestry export earnings, although forestry export earnings still increased for the year ended 31 December 2011.
- › Forestry accounted for 9.8 percent of total merchandise exports, compared with 10.2 percent in the year ending 31 December 2010.
- › Total sawn timber export earnings and volumes decreased to NZ\$ 751.0 million and 1.9 million cubic metres, respectively due to high domestic log prices and strong competition from other sawn timber suppliers in overseas markets.
- › The value of forestry exports increased by NZ\$ 257.5 million (6.1 percent) to NZ\$ 4500 million for the year ending 31 December 2011, due to continued high demand for logs from China, particularly in the June and September 2011 quarters.

FORESTRY PRODUCTION AND TRADE

FOR THE DECEMBER 2011 QUARTER

Figures in this release are compared with the same quarter of the previous year (December 2010) unless otherwise stated. These figures are not seasonally adjusted.

Harvesting activity

New Zealand roundwood removals increased 7.5 percent to an estimated 26.2 million cubic metres for the year ending 31 December 2011.

For the December 2011 quarter, roundwood removals increased 0.9 percent to an estimated 6.3 million cubic metres, mainly due to continued high demand for export logs. Log exports accounted for 48.2 percent of total removals this quarter compared with 49.0 percent in the December 2010 quarter.

Figure 1: Roundwood removals by log type – quarterly volumes

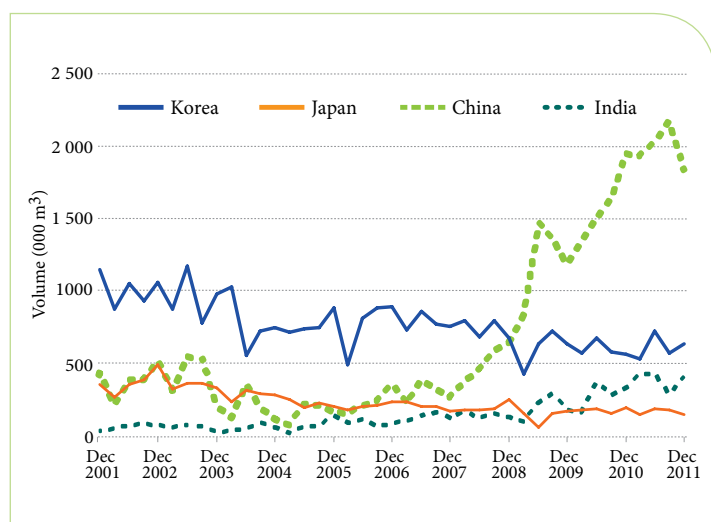

Export logs

Export log earnings and volumes fell 10.8 and 0.9 percent respectively in the December 2011 quarter mainly due to an over supply of logs in Chinese ports. Total log export earnings were up 22.4 percent to NZ\$ 1700 million while export log volumes increased 17.6 percent to 12.8 million cubic metres for the year ending 31 December 2011. China has dominated New Zealand's log export market throughout the year, resulting in historical high log export prices and volumes.

The all-grade average export log price dropped to NZ\$ 120.3 per Japanese Agricultural Standard (JAS) cubic metre compared with the NZ\$ 135.6 per JAS in the December 2010 quarter. This price adjustment is mainly due to the recent log over supply in the Chinese market.

Figure 2: Log exports by country of destination – quarterly volumes

Sawn timber production

High domestic log prices, coupled with weak domestic demand, continued to impact heavily upon the New Zealand sawmilling industry. Total sawn timber production fell 6.2 percent to 3.8 million cubic metres for the year ending 31 December 2011.

However, sawn timber production for the December 2011 quarter is around the same level as for the December 2010 quarter. Sawmillers have reduced stock holdings by 15 000 cubic metres. The stock reduction in the December quarter is normal for timber producers due to breaks in production over the holiday period.

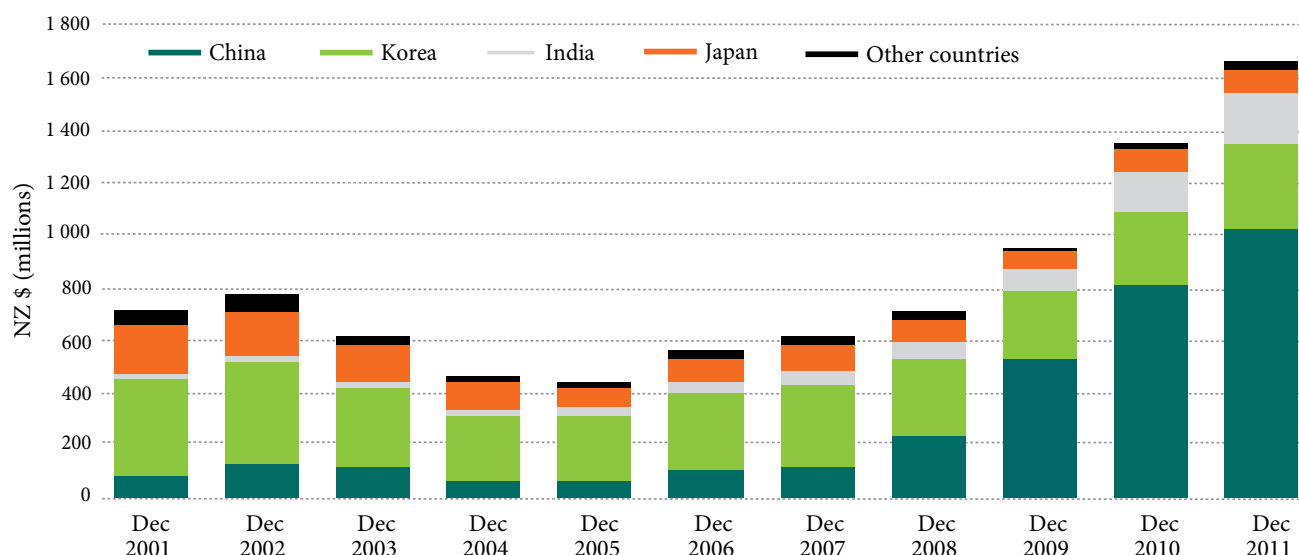

Sawn timber exports

New Zealand timber exports continue to face challenges in overseas markets. Total sawn timber export earnings and volumes decreased 10.8 and 5.7 percent to NZ\$ 751.0 million and 1.9 million cubic metres respectively, for the year ending December 2011.

New Zealand timber suppliers are facing increased competition from Eastern European countries in the Australian market. The weak performance of the US housing market has resulted in low demand for New Zealand timber. The weak US housing market also caused the Canadian and US timber suppliers to shift their focus from the US domestic market to the Chinese market, increasing competition for New Zealand timber suppliers in the Chinese market.

The December 2011 quarter total sawn timber export earnings fell 8.8 percent to NZ\$ 193.1 million. Sawn timber export volumes decreased by 19.3 percent to 484 000 cubic metres.

Figure 3: Log exports by country of destination – annual earnings

Panel productions

Production of all panel products increased over the year ending December 2011 to 2 000 000 cubic metres, led by a 44 000 cubic metre increase in veneer production to 708 000 cubic metres. Increased production of panel products was mainly due to the increased demand from Japan after the earthquake occurred in the North Eastern part of Japan on 11 March 2011.

Total panel production increased 25 000 cubic metres to 484 000 cubic metres for the December 2011 quarter.

Panel exports

Both export values and volumes of panels increased over the year ending December 2011, up 8.3 and 16.3 percent respectively, mainly due to increased demand from Japan.

For the December 2011 quarter, the value of particleboard exports decreased by 1.3 percent to NZ\$ 10.7 million.

However, the volume of particleboard exports increased by 8.3 percent to 17 000 cubic meters, particularly to Japan. Fibreboard export earnings and volumes increased for the quarter by NZ\$ 13.4 million and 20 000 cubic metres, respectively due to increased demand from Japan.

Pulp and paper production

Total pulp production fell 81 000 air-dry tonnes to 1.52 million air-dry tonnes over the year ending 31 December 2011, mainly due to a significant fall in chemical pulp exports to China.

For the December 2011 quarter, both mechanical and chemical pulp production and total pulp production reduced by 9.7 percent to 382 000 air-dry tonnes. High prices for pulp logs and low volumes of sawmill residues continue to affect pulp production in New Zealand.

Pulp and paper exports

Total pulp export volumes increased by 37 000 tonnes (4.7 percent) to 817 000 tonnes compared to the December 2010 quarter but export earnings decreased by NZ\$ 15.1 million (2.4 percent) to NZ\$ 611.3 million. Increased export earnings of mechanical pulp to Japan were offset by a sharp decrease in export earnings from chemical pulp to China.

Imports

The total value of forestry imports decreased 0.5 percent to NZ\$ 1400 million over the year ending 31 December 2011. This value represents 3.1 percent of total merchandise imports.

Imports of paper and paperboard increased in value (CIF), up 22.6 percent to NZ\$ 700 million respectively.

Information about the forestry quarterly surveys

The forestry quarterly surveys provide a regular and comprehensive review of New Zealand's forestry production activity. MAF publishes statistics for multiple wood products such as logs, sawn timber, panels, pulp and paper on a quarterly and annual basis. The survey population represents approximately 240 timber, panel, pulp and paper mills located in New Zealand.

Confidentiality rules are applied to all tables in the form of rounding and aggregation to maintain respondent privacy.

The target response rate across all forestry quarterly surveys is 85 percent. The total response rate for the December 2011 quarter was 91 percent, of which, a response rate of 100 percent was received from all surveyed panel, pulp and paper mills.

To find out more about the forestry quarterly surveys or to search for more data, please go to the Ministry of Agriculture and Forestry website at <http://www.maf.govt.nz/news-resources/statistics-forecasting/forestry.aspx> or free phone 0800 008 333.

Information about the forestry trade data

The forestry trade data used in this release is sourced from Statistics New Zealand and compiled by Information and Analysis, Ministry of Agriculture and Forestry.

To find out more about overseas trade data or to search for more data, please go to the Statistics New Zealand website at www.stats.govt.nz or free phone 0508 525 525.

NOTES

1. All production figures since the December 2011 quarter in this release are provisional; all December 2011 trade figures are provisional.
2. Export values are NZ\$ free on board (fob) the value of goods at New Zealand ports before export, includes cost of transport to port.
3. Includes paper, veneer, chips and other forestry product exports.
4. Excludes newsprint exports. This is suppressed to comply with Statistics New Zealand confidentiality rules.
5. Import values are NZ\$ cost of goods including insurance and freight to New Zealand (CIF).

Notes

- Individual entries may not sum to totals shown due to rounding.
- Fibreboard includes hardboard, softboard and medium density fibreboard (mdf) from the December 1996 quarter. Prior to this, triboard and strandboard had been included in this category. The change has been made in line with HS export and import codes.
- Veneer production includes veneer intended for further production into plywood or laminated veneer lumber in New Zealand.
- Plywood production includes laminated veneer lumber production.
- Particleboard includes particleboard, triboard and strandboard from the December 1996 quarter. (See Note 3.)

Notes

- 1 Logs are those items in HS item codes 4403. Logs include posts and poles. Values are NZ\$ free on board (f.o.b.). Quantity of logs is expressed in cubic metres of roundwood (m³ (r)).
- 2 Individual entries may not sum to totals shown due to rounding.
- 3 Comprises Melanesia, Micronesia and Polynesia (excluding Hawaii) and Norfolk Island.
- 4 Other countries are all other countries to which New Zealand exported logs.

Notes

- 1 Hardwood chips are those items in HS item codes 4401.22. Values are NZ\$ free on board (f.o.b.). Because of item misclassification, exports for some quarters have been adjusted and may not necessarily agree with those published by Statistics New Zealand.
- 2 Individual entries may not sum to totals shown due to rounding.
- 3 One BDU (bone dry unit) of hardwood chips in roundwood equivalent is 2.25 cubic metres and weighs 1090 kilograms when oven dry.
- 4 Other countries are all other countries to which New Zealand exported hardwood chips.

Notes

- 1 Sawn timber is those items in HS codes 4406 and 4407. Values are NZ\$ free on board (f.o.b.).
- 2 Individual entries may not sum to totals shown due to rounding.
- 3 Other countries are all other countries to which New Zealand exported sawn timber.

Notes

- 1 Fibreboard is those export items in HS item grouping 4411. Values are NZ\$ free on board (f.o.b.).
- 2 Individual entries may not sum to shown totals due to rounding.
- 3 Comprises Melanesia, Micronesia and Polynesia and Norfolk Island (excluding Hawaii).
- 4 Fibreboard exports have been suppressed for the September 2011 quarter and year end due to data quality issues from Statistics New Zealand.
- 5 Other countries are all other countries to which New Zealand exported fibreboard.
