

Appendix 1: CTO Direction – Processed animal feeds using food grade sea containers and direct loading.

Pursuant to sections 27 and 104 of the Biosecurity Act 1993 I ; give the following directions for consignments of processed stockfeed imported under the following equivalent conditions:

- A permit to import is issued to specify that consignments with direct loading of product into food grade sea containers is equivalent to the pre-export fumigation requirement in section 3.1.6 and 3.2.3 of the import health standard (IHS) BNZ-PAFP-IMPRT *Importation into New Zealand of Processed Animal Feeds of Plant Origin*, which effectively manages the risks identified in the IHS. The manufacturer will confirm using a manufacturer's certificate that consignments have been loaded directly from processing into a food grade sea container.
- Consignments will have to meet all other requirements as per Section 7.3, 7.4, 7.5 or 7.6 of the IHS.
