

MINISTRY FOR PRIMARY INDUSTRIES

IMPORTING COUNTRIES PHYTOSANITARY REQUIREMENTS

NORWAY

Status: Approved

Date: 13 June 2002

EXPORTERS ARE ADVISED TO CONFIRM THE PHYTOSANITARY IMPORT REQUIREMENTS PRIOR TO EXPORT FROM NEW ZEALAND

Amendment record

| Amendment No. | Date: | Nature of amendment: | Approved by: |
|---------------|-------------------|--|--------------|
| 12. | 22 August 2023 | <p>Removed exceptions to <i>Solanaceae</i> prohibition and corrected scientific name for <i>Coniferales</i> under section 2.1 Prohibitions.</p> <p>Amended scientific name (typo) for <i>Gleditsia triacanthos</i> and removed <i>Pinus</i> spp. from under section 4.3.3 Plants (Nursery).</p> | AS |
| 11. | 21 May 2021 | <p>Updated section 2.1 Prohibitions to include <i>Quercus</i> spp.</p> <p>Updated section 2.3 Phytosanitary Certificates</p> <p>Updated section 4.1.1 Fresh Fruit and Vegetables for <i>Allium cepa</i>, and added <i>Foeniculum vulgare</i>, <i>Fortunella</i> spp., <i>Poncirus</i> spp., and <i>Rubus idaeus</i>.</p> | GF |
| 10. | 27 September 2018 | <p>Updated the prohibitions list, section 2.1</p> <p>Updated the requirements for <i>Cydonia</i> spp., <i>Fragaria</i> spp., <i>Malus</i> spp., and <i>Pyrus</i> spp. nursery stock, Section 4.3.3.</p> | GF |

| Amendment No. | Date: | Nature of amendment: | Approved by: |
|---------------|-----------------|--|--------------|
| | | Reformatted the presentation of Quarantine Pest List, Appendix 1. | |
| 9. | 30 October 2017 | <p>Added timeframe for issuance of phytosanitary certificate under section 2.3.3</p> <p>Added 4 pests and note regarding native species to Quarantine Pest list section 2.4.</p> <p>Updated titles of sections relating to Seeds, Nuts and Grains to align with other ICPRs.</p> <p>Added additional declaration for <i>Betula</i> spp nursery stock section 4.3.3</p> | HK |
| 8. | 02 May 2017 | <p>Updated links to MPI website.</p> <p>Updated disclaimer, added table headings to tables and added fees and charges section 1.4.</p> <p>Removed Maximum Pest Limit (MPL), section 2.5. MPL is covered in the MPI Certification Standard and is not within the scope of the ICPR.</p> <p>Reformatted presentation of the amendment record to start with most recent amendment.</p> | HK |
| 7. | 5 August 2014 | <p>Updated MAFBNZ to MPI (Ministry for Primary Industries).</p> <p>Updated additional declarations to align with the 'Regulations of 1 December 2000 no. 1333 relating to plants and measures against pests' and 'Regulation 17 March 2003 no. 341 on measures against <i>Phytophthora ramorum</i>' (Changed how additional declarations are required to be stated on the phytosanitary certificate).</p> <p>Additional sentence added to section 1.2 to clarify scope of ICPR.</p> <p>Additional section for wood packaging, section 2.8.</p> <p>Changed heading of section 2.5 to 'MPI specified Maximum Pest Limits (MPL)'.</p> | SB |
| 6. | 29 March 2007 | Amendment of MAF contact details Section 1.1 | SW |

| Amendment No. | Date: | Nature of amendment: | Approved by: |
|---------------|------------------|--|--------------|
| | | | |
| 5. | 3 February 2005 | Amendment of MAF contact details Section 1.1 and 1.2. Minor reformatting of document. | WJH |
| 4. | 7 April 2004 | Sec 2.4 Addition of 'Plants and other regulated articles' to List 2: <i>Pests whose introduction into, and/or whose spread within Norway is prohibited if these are present on the plants and other regulated articles specified</i> | SJW |
| 3. | 14 February 2003 | Renaming and reformatting of standard. Amendment to Section 2.5 re MPLs. | WJH |
| 2. | 18 June 2002 | Amendment to Sections 2.3.2 and 4.3.1 | WJH |
| 1. | 13 June 2002 | Issue of EPS | WJH |

DISCLAIMER

The information in this document is provided on the following basis. The phytosanitary requirements found in this document are current at the time of publication and may be used as the basis of export certification. However, the requirements may be changed at any time by importing countries at any time at short notice or with no notice to New Zealand. This information is provided strictly on the basis that the Crown, the Ministry for Primary Industries, its statutory officers, employees, agents and all other persons responsible for or associated with the compilation, writing, editing, approval or publication of the information:

1. Disclaim any and all responsibility for any inaccuracy, error, omission, lateness, or any other kind of inadequacy, deficiency or flaw in, or in relation to, the information
and
2. Without limiting (1) above, fully exclude any and all liability of any kind on the part of all of them, to any person or entity that chooses to rely on this information

Compliance with this document is not to be taken as a guarantee that any particular goods will be granted access to any overseas market. We recommend that exporters work with their importers to obtain the most up-to-date information.

1 General Information

1.1 For enquiries email the Plant Exports Team:

plantexports@mpi.govt.nz

To help Exports process your email please record in the subject line of your email descriptive keywords which are relevant to your enquiry i.e. ICPR enquiry-Country-specific details.

For urgent enquiries phone the Plant Exports Team
Telephone: +64 4 894 5693

1.2 Scope

The requirements listed in this ICPR apply to product of New Zealand only, unless specifically stated.

As there are no New Zealand legislative requirements for certification of exported plant products, the technical phytosanitary requirements are determined by the importing country for plant produce being imported into their country. In this respect, ICPRs are MPI's summary of the importing country's legal requirements and thus forms a basis upon which export phytosanitary certification is provided.

Where an importing country operates on the basis of issuing import permits to their importers, the import permit conditions take precedence over any technical conditions contained in the MPI ICPR for that country.

This ICPR specifies Norway's phytosanitary requirements for the stated commodities and commodity classes only. If a commodity or commodity grouping is not identified within Section 3 or Section 4 exporters should contact:

- Norway directly to ascertain requirements refer Section 2.2.2

or

- Ministry for Primary Industries (MPI) – Plant Exports

Users of this document are strongly advised to review all sections of the ICPR for the determination of a commodity's phytosanitary requirements.

1.3 Phytosanitary Legislation

The following legislation controls the importation of plants and plant materials into Norway

- Act of 4 December 1970 on Seeds
- Act of 12 May 1995 No. 23 on Soil (Section 3)
- Act of 23 June 2000 No. 53 on Plant Health

1.4 Fees and Charges

Please note that the determination and provision of phytosanitary requirements for a commodity not listed within the ICPR may be undertaken on a cost recovered basis. A link to the list of Plant Exports Fees and Charges is available on <http://mpi.govt.nz/exporting/food/fruit-and-vegetables/fees-and-charges/>

2 General Requirements

2.1 Prohibitions

ref Annex 3

The following commodities are prohibited entry to Norway:

Table 1 List of commodities prohibited entry to Norway

| Scientific Name | Common Name | Plant Part Prohibited |
|--|-------------|---|
| <i>Amelanchier</i> spp. | | Plants other than seeds and fruit but including live pollen for pollination |
| <i>Aronia</i> spp. | | Plants other than seeds and fruit but including live pollen for pollination |
| <i>Castanea</i> spp. | Chestnut | Plants (other than seeds and fruits), isolated bark and wood waste |
| <i>Choenomeles</i> spp. | | Plants other than seeds and fruit but including live pollen for pollination. |
| Coniferales | | Plants (other than seeds and fruit), wood with bark and chips of wood with bark, isolated bark and wood waste |
| <i>Cotoneaster</i> spp. | | Plants intended for planting other than seeds and fruit but including live pollen for pollination |
| <i>Crataegus</i> spp. | | Plants other than seeds and fruit but including live pollen for pollination |
| <i>X Crataemespilus</i> spp.E.G Camus | | Plants other than seeds and fruit but including live pollen for pollination |
| <i>Cydonia</i> spp. except <i>C. oblonga</i> Mill. When used or to be used as rootstock for <i>Pyrus communis</i> L (edible fruit) | | Plants other than seeds and fruit but including live pollen for pollination |
| <i>Eriobotrya</i> spp. | | Plants other than seeds and fruit but including live pollen for pollination |

| Scientific Name | Common Name | Plant Part Prohibited |
|---|--|---|
| <i>Malus</i> spp. except production trees of <i>M. domestica</i> Borkh (edible fruit) and other species of <i>Malus</i> Mill. When used or to be used as rootstock for <i>M. domestica</i> Borkh (edible fruit) | | Plants other than seeds and fruit but including live pollen for pollination |
| <i>Mespilus</i> spp. | | Plants other than seeds and fruit but including live pollen for pollination |
| <i>Photinia</i> spp. | | Plants other than seeds and fruit but including live pollen for pollination |
| <i>Prunus</i> spp. | | Plants other than seeds and fruit |
| <i>Pyracantha</i> spp. | | Plants other than seeds and fruit but including live pollen for pollination |
| <i>Pyrus</i> spp. except production trees of <i>Pyrus communis</i> L (edible fruit) and other species of <i>Pyrus</i> L when used or to be used as rootstock for <i>Pyrus communis</i> L (edible fruit) | | Plants other than seeds and fruit but including live pollen for pollination |
| <i>Quercus</i> spp. | | Plants (other than seeds and fruits), isolated bark (other than bark from <i>Quercus suber</i>) and wood waste |
| <i>Stranvaesia</i> spp. | | Plants other than seeds and fruit but including live pollen for pollination |
| Solanaceae | | Plants intended for planting other than seed |
| <i>Sorbus</i> spp. | | Plants other than seeds and fruit but including live pollen for pollination. |
| | Soil and organic growing media, other than growing media that is composed entirely of peat | |
| | Grass, straw and hay when used as packaging for plants or parts of plants | All |

2.2 Phytosanitary Import Permits

ref Section V

2.2.1 Import permits are not required for the entry of plants or plant products into Norway

2.2.1 Approval from the Norwegian Agricultural Inspection Service is required for the importation of genetically modified organisms. ref Section V Point 16

2.2.2 Conditions for import may be requested from:

Ms. Hilde Paulsen
Mattilsynet,
Hovedkontoret
PO Box 383
N -2381 Brumunddal
NORWAY

Telephone: +47 64 944 346 or +47 22 400 000

Facsimile: +47 23 216 801

Email: ippc@mattilsynet.no

Alternate Email: hilde.paulsen@mattilsynet.no

2.3 Phytosanitary Certificates

ref V Point 19

Phytosanitary certificates are required to accompany all consignments from New Zealand (unless specified otherwise in the Commodity Specific Requirements below) with the exception of:

- Up to 50 small packages of horticultural seeds imported via travellers hand luggage or by post
- Passenger accompanied plants. Allowable quantities (with the exception of species identified as prohibited in Section 2.1) as specified below:

ref Annex 9

- Maximum of 25 cut flowers
- Maximum of 3kg of flower bulbs and corms
- Maximum of 10kg of fruit, berries and vegetables (excluding potatoes)

Plants and parts of plants imported under the above exception can only be imported for personnel use and must not be used for commercial purposes

2.3.1 Original of the phytosanitary certificate issued by the country of origin is required to accompany re export certificates ref V Point 20

2.3.2 Additional declarations identified within this document for specific commodities are required to be entered upon a phytosanitary certificate.

2.3.3 Phytosanitary certificates shall not be issued earlier than 14 days before shipping.

2.4 Quarantine Pests

For a list of quarantine pests see Appendix 1. The preferred name and classification used is checked for accuracy against the European and Mediterranean Plant Protection Organisation (EPPO) Global database (<https://gd.eppo.int/>). Please note that scientific names remains as the definitive name. In addition to the preferred name, MPI will also include synonyms specified by the importing country for use on additional declarations. Quarantine pests for China include organisms specified in Appendix 1 of this ICPR, additional declarations and/or import permit.

Note: Exporters should be aware that New Zealand has a number of endemic and native organisms that are unlikely to be listed on an importing country's quarantine pest list, but would almost certainly be treated as quarantine pests if found at import inspection. Phytosanitary Inspectors should take this into account when making decisions about the eligibility of product for an overseas market and treat endemic and native species found at phytosanitary inspection as quarantine pests unless there is clear evidence to the contrary. The New Zealand Organisms Register provides a search tool that can be used to determine whether the organism is endemic, native to NZ or introduced. Follow the link here: <http://www.nzor.org.nz/search>.

2.5 Ports of Entry

ref V Point 21

Entry of all consignments is restricted to the following ports:

- Oslo (Oslo regional customs office and the Gardermoen division of the customs procedures department)
- Tønsberg (Tønsberg customs office)
- Kristiansand (Kristiansand regional customs office)
- Stavanger (Stavanger regional customs office)
- Bergen (Bergen regional customs office)
- Stjørdal (Trondheim regional customs office)
- Bodø (Bodø regional customs office)
- Tromsø (Tromsø regional customs office)
- Vadsø (Vadsø customs office)

Alternative ports of entry may be permitted by prior arrangement

2.6 Inspection on Arrival

All consignments of imported plant material are subject to inspection by Norwegian authorities for phytosanitary purposes on arrival.

2.7 Wood Packaging

Refer to Forestry ICPR for Norway, link below:

<http://www.mpi.govt.nz/law-and-policy/requirements/importing-countries-phytosanitary-requirements/forestry-icprs/norway/>

2.8 Transit

ref V Point 22

Consignments transiting Norway must be packaged / transported within sealed conveyances. If sealing is unable to be undertaken, prior permission from the Norwegian Agricultural Inspection Service must be sought.

3 Commodity Class Requirements

3.1 Fruit and Vegetables

3.1.1 Fresh Fruit and Vegetables

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required in some instances. Note all unwashed vegetables with roots require a phytosanitary certificate. Refer Section 4.1.1 for commodity specific requirements.

3.1.2 Dried Fruit and Vegetables

Conditions:

Phytosanitary import permit and phytosanitary certificate not required.

3.1.3 Frozen Fruit and Vegetables

Conditions:

Phytosanitary import permit and phytosanitary certificate not required.

3.2 Cut Flowers and Foliage

3.2.1 Fresh Cut Flowers and Foliage

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required in some instances. Refer Section 4.2.1 for commodity specific requirements.

3.2.2 Dried Cut Flowers and Foliage

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate not required.

3.3 Nursery Stock

3.3.1 Plants and parts of plants for propagation (other than seeds)

Conditions:

Plant import permit not required. Phytosanitary certificate required. Refer Section 4.3 for commodity specific requirements.

3.4 Seeds, Grains and Nuts

3.4.1 Seeds, Grains and Nuts for Sowing

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required in some instances. Refer Section 4.4.1 for commodity specific requirements.

3.4.2 Seeds, Grains and Nuts for Consumption

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate not required.

3.4.3 Seeds, Grains and Nuts for Processing

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate not required.

3.5 Growing Media and Soil Improvers

ref Annex 5 Point 9

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required. Growing media, soil and soil improvers that consist in whole or in part of soil or of solid organic material such as parts of plants, compost, bark, peat or natural fertilisers. Refer Section 4.5

3.6 Packaging

ref V Point 18

Conditions:

The use of grass, hay and straw as packaging for plants and parts of plants is prohibited.

3.7 Micro-organisms, Microbiological and Laboratory Specimens

Conditions:

Requirements not known. Refer Section 1.2

4 Commodity Specific Requirements

4.1 Fruit and Vegetables

4.1.1 Fresh Fruit and Vegetables

Actinidia deliciosa

Kiwifruit

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Allium cepa

Onion

Conditions:

Plant import permit not required. Phytosanitary certificate required.

Allium porrum

Leek

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Allium sativum

Garlic

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Annona cherimola

Cherimoya

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Apium graveolens var. dulce

Celery

Conditions:

Plant import permit not required. Phytosanitary certificate required when imported during the period 16th April to 30th September.

Asparagus spp.

Asparagus

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Beta vulgaris var. crassa

Beetroot / Sugar beet

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Brassica oleracea var. botrytis

Cauliflower

Conditions:

Plant import permit not required. Phytosanitary certificate required when imported during the period 16th April to 30th September.

Brassica oleracea var. gemmifera

Brussels sprouts

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Brassica oleracea var. italica

Broccoli

Conditions:

Plant import permit not required. Phytosanitary certificate required when imported during the period 16th April to 30th September.

Citrus spp.

Citrus

Conditions:

Plant import permit not required. Phytosanitary certificate required.

Cichorium intybus

Chicory

Conditions:

Plant import permit not required. Phytosanitary certificate required when imported during the period 16th April to 30th September.

Cucumis melo

Melons

Conditions:

Plant import permit not required. Phytosanitary certificate required when imported during the period 16th April to 30th September.

Cucurbita maxima

Squash

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Cydonia oblonga

Quince

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Cyphomandra betacea

Tamarillo

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Daucus carota

Carrot

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Diospyros kaki

Persimmon (Japanese)

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Foeniculum vulgare

Fennel

Conditions:

Plant import permit not required. Phytosanitary certificate required when imported during the period 16th April to 30th September.

Fragaria spp.

Strawberry

Conditions:

Plant import permit not required. Phytosanitary certificate required when imported during the period 16th April to 30th September.

Foeniculum vulgare

Conditions:

Plant import permit not required. Phytosanitary certificate required when imported during the period 16th April to 30th September.

Fortunella spp.

Conditions:

Plant import permit not required. Phytosanitary certificate required.

Ipomoea batatas

Kumara

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Lactuca spp.

Lettuce

Conditions:

Plant import permit not required. Phytosanitary certificate required when imported during the period 16th April to 30th September.

Lycopersicon esculentum

Tomato

Conditions:

Plant import permit not required. Phytosanitary certificate required when imported during the period 16th April to 30th September.

Malus sylvestris var. pumila

Apples

Conditions:

Plant import permit not required. Phytosanitary certificate required.

Mangifera indica

Mangoes

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Passiflora edulis

Passionfruit

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Persea americana

Avocado

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Poncirus spp.

Conditions:

Plant import permit not required. Phytosanitary certificate required.

Prunus spp.

Stonefruit/Summerfruit

Conditions:

Plant import permit not required. Phytosanitary certificate required.

Psidium spp.

Guava

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Pyrus communis

Pear

Conditions:

Plant import permit not required. Phytosanitary certificate required.

Rubus idaeus

Raspberry

Conditions:

Plant import permit not required. Phytosanitary certificate required when imported during the period 16th April to 30th September.

Ribes nigrum

Blackcurrent

Conditions:

Plant import permit not required. Phytosanitary certificate required when imported during the period 16th April to 30th September.

Ribes rubrum

Conditions:

Plant import permit not required. Phytosanitary certificate required when imported during the period 16th April to 30th September.

Ribes uva-crisp

Conditions:

Plant import permit not required. Phytosanitary certificate required when imported during the period 16th April to 30th September.

Rubus idaeus

Raspberry

Conditions:

Plant import permit not required. Phytosanitary certificate required when imported during the period 16th April to 30th September.

Solanum melongena

Egg Plant

Conditions:

Plant import permit not required. Phytosanitary certificate required when imported during the period 16th April to 30th September.

Solanum tuberosum

Potato (consumption only)

Conditions:

Plant import permit not required. Phytosanitary certificate and additional declaration

required.

Additional declaration

“Consignment complies with Annex 4A, point 18.1 (a) of Regulations relating to plants and measures against pests”

This declares the tubers originate in a country known to be free from *Ralstonia solanacearum*

or

“Consignment complies with Annex 4A, point 18.1 (b) of Regulations relating to plants and measures against pests”

This declares the tubers originate in areas under official supervision for *Ralstonia solanacearum*

and

This declares the place of production has been inspected and found to be free from *Ralstonia solanacearum* during the last cycle of production

and

“Consignment complies with Annex 4A, point 18.2 (a) of Regulations relating to plants and measures against pests”

This declares the tubers originate in a place of production where *Synchytrium endobioticum* has never occurred

or

“Consignment complies with Annex 4A, point 18.2 (b) of Regulations relating to plants and measures against pests”

In accordance with an EPPO recognised method, there is an official statement that *Synchytrium endobioticum* no longer occurs in the place of production

and

“Consignment complies with Annex 4A, point 18.3 (a) of Regulations relating to plants and measures against pests”

The tubers originate in a country which is known to be free from *Clavibacter michiganensis* ssp. *sepedonicus*

or

“Consignment complies with Annex 4A, point 18.3 (b) of Regulations relating to plants and measures against pests”

The tubers originate at a place of production which has been inspected during the last cycle of vegetation and has been officially confirmed as being free from *Clavibacter michiganensis* ssp. *sepedonicus* either because the pest has never been known to occur at the location, or in the event of the pest being found at the place of production the premises have been placed under an official eradication programme and official follow up inspection for *Clavibacter michiganensis* ssp. *sepedonicus* has occurred

and

“Consignment complies with Annex 4A, point 18.4 of Regulations relating to plants and measures against pests”

The tubers were grown in a field which has undergone official inspection at least once during the last four years for *Globodera pallida* and *Globodera rostochiensis* by means of an EPPO recognised method

Vaccinium corymbosum

Blueberry

Conditions:

Plant import permit not required. Phytosanitary certificate required.

Vitis spp.

Grape

Conditions:

Plant import permit not required. Phytosanitary certificate required

4.1.2 Dried Fruit and Vegetables

Refer Section 3.1.2

4.1.3 Frozen Fruit and Vegetables

Refer Section 3.1.3

4.2 Cut Flowers

4.2.1 Fresh Cut Flowers and Foliage

Dendranthema spp.

Conditions:

Plant import permit not required. Phytosanitary certificate and additional declaration required.

Additional Declaration:

"No signs of *Spodoptera litura* have been observed at the place of production since the beginning of the last complete cycle of vegetation"

or

"The plants have undergone appropriate treatment to protect them from *Spodoptera litura*"

Dianthus spp.

Conditions:

Plant import permit not required. Phytosanitary certificate and additional declaration required.

Additional Declaration:

"No signs of *Spodoptera litura* have been observed at the place of production since the beginning of the last complete cycle of vegetation"

or

"The plants have undergone appropriate treatment to protect them from *Spodoptera litura*"

Gerbera spp.

Conditions:

Plant import permit not required. Phytosanitary certificate required.

Gypsophila spp.

Conditions:

Plant import permit not required. Phytosanitary certificate required.

Pelargonium spp.

Conditions:

Plant import permit not required. Phytosanitary certificate and additional declaration required.

Additional Declaration:

"No signs of *Spodoptera litura* have been observed at the place of production since the beginning of the last complete cycle of vegetation"

or

"The plants have undergone appropriate treatment to protect them from *Spodoptera litura*"

Rosa spp.

Conditions:

Plant import permit not required. Phytosanitary certificate required.

4.2.2 Dried Cut Flowers and Foliage

Refer Section 3.2.2

4.3 Nursery Stock

4.3.1 Explanation of Additional Declaration (AD) Format

Definition of plants (nursery) for the determination of AD's for Norway

Nursery stock includes whole plants and parts of plants intended for planting when exported as nursery stock. Includes bulbs, corms, rhizomes and tubers. Does not include seed for sowing.

Additional Declarations

Additional declarations identified within Section 4.3.3 are indicated in two ways. The first a numbering format eg.

2,5,6 Numbers in standard text are compulsory requirements

1,4 Numbers in bold are consignment dependent eg. where roots are attached

Secondly, AD's for a specific species that are additional to that indicated by the stated numbers will be identified where applicable.

Additional declarations are required to be entered onto the phytosanitary certificate.

4.3.2 Reference for Additional Declarations

1 **Soil and growing medium attached to or associated with plants, intended for planting:** ref Annex 4a 29.1

Additional declarations:

“Consignment complies with Annex 4A, point 29.1 (a) of Regulations relating to plants and measures against pests”

The growing medium at the time of planting was free from soil and organic matter or

The growing medium, at the time of planting was found free from insects and harmful nematodes and has been subjected to appropriate examination or treatment to ensure that it was free from other pests

or

The growing medium at the time of planting was subjected to appropriate heat treatment or fumigation to ensure freedom from pests

and

“Consignment complies with Annex 4A, point 29.1 (b) of Regulations relating to plants and measures against pests”

The growing medium since planting has been subjected to appropriate measures to ensure that it has been maintained free from pests,

or

The plants during the last two weeks prior to dispatch were shaken free of medium leaving the minimum amount necessary to sustain vitality during transport and in the event of replanting, that the growing medium used meets the requirements as identified above.

2. **Plants intended for planting** ref Annex 4a 30

Additional declarations:

“Consignment complies with Annex 4A, point 30 (a) of Regulations relating to plants and measures against pests”

The plants originate in a country known to be free from *Thrips palmi*
or

“Consignment complies with Annex 4A, point 30 (b) of Regulations relating to plants and measures against pests”

The place of production was found to be free from *Thrips palmi* at official inspections carried out at least monthly during the three months prior to export
or

“Consignment complies with Annex 4A, point 30 (c) of Regulations relating to plants and measures against pests”

The consignment has undergone appropriate treatment to ensure freedom from *Thysanoptera*

Note *Thrips palmi* is not known to occur in New Zealand

3. **Plants intended for planting, with growing medium, traded in pots or other containers** ref Annex 4 29.2

Additional declarations:

“Consignment complies with Annex 4A, point 29.2 (a) of Regulations relating to plants and measures against pests”

The consignment originates from a place of production found free from *Arthurdendyus triangulatus*. The determination of ‘area freedom’ must be recognised by the European Plant Protection Organisation (EPPO)
or

“Consignment complies with Annex 4A, point 29.2 (b) of Regulations relating to plants and measures against pests”

The plants have been grown on raised benches, slatted or open-meshed
or

“Consignment complies with Annex 4A, point 29.2 (c) of Regulations relating to plants and measures against pests”

The consignment has been subjected to a treatment to eliminate *Arthurdendyus triangulatus* Method of disinfestation must meet EPPO requirements.

4. **Plants intended for planting, with roots, grown in the open air** ref Annex 4a 28

Additional declarations:

“Consignment complies with Annex 4A, point 28 of Regulations relating to plants and measures against pests”

The place of production is free from *Clavibacter michiganensis* ssp. *sepedonicus*,

Globodera pallida, *Globodera rostochiensis*, *Phytophthora fragariae* var. *fragariae*, *Ralstonia solanacearum* and *Synchytrium endobioticum*

5. Plants, intended for planting, other than seeds and plants in tissue culture

Ref Annex 4a 31

Additional declarations:

“Consignment complies with Annex 4A, point 31 (a) of Regulations relating to plants and measures against pests”

The plants are free from plant debris

and

“Consignment complies with Annex 4A, point 31 (b) of Regulations relating to plants and measures against pests”

Have been grown in nurseries

and

“Consignment complies with Annex 4A, point 31 (c) of Regulations relating to plants and measures against pests”

The plants have been inspected at appropriate times and prior to export and have been found free from any symptoms of harmful bacteria, viruses and virus-like pathogens, and either found free from signs or symptoms of harmful nematodes, insects, mites and fungi, or have been subjected to appropriate treatment to eradicate such organisms

Definition of "nursery" - a plot of ground where young plants are reared for transplantation especially trees etc for sale. Reference Concise Oxford Dictionary.

6. Plants intended for planting (other than seeds and plants in tissue culture) of deciduous trees and shrubs. Ref Annex 4a 32

Additional declarations:

“Consignment complies with Annex 4A, point 32 of Regulations relating to plants and measures against pests”

The plants are dormant and are free from leaves, flowers and fruits

7. Plants intended for planting (other than seeds) of herbaceous species other than those identified in Condition 8 below ref Annex 4a 27.2

Additional declarations:

“Consignment complies with Annex 4A, point 27.2 (a) of Regulations relating to plants and measures against pests”

No signs of *Amauromyza maculosa* or *Liriomyza sativae* were observed at the place of production during an official inspection carried out prior to export

or

“Consignment complies with Annex 4A, point 27.2 (b) of Regulations relating to plants and measures against pests”

Immediately prior to export the plants have been inspected and found free from signs of *Amauromyza maculosa* and *Liriomyza sativae*, and have been subjected to an appropriate treatment aimed at eradicating the pest

Note *Amauromyza maculosa* and *Liriomyza sativae* are not known to occur in New

8. Plants intended for planting (other than seeds) of *Apium graveolens*, *Argyranthemum* spp., *Aster* spp., *Brassica* spp., *Capsicum annuum*, *Cucumis* spp., *Dendranthema* spp., *Dianthus* spp. and hybrids, *Exacum* spp., *Gerbera* spp., *Gypsophila* spp., *Lactuca* spp., *Leucanthemum* spp., *Lupinus* spp., *Lycopersicon esculentum*, *Solanum melongena*, *Tanacetum* spp., and *Verbena* spp.

Additional declaration:

“Consignment complies with Annex 4A, point 27.1 of Regulations relating to plants and measures against pests”

No signs of *Amauromyza maculosa*, *Liriomyza huidobrensis*, *Liriomyza sativae* and *Liriomyza trifolii* were observed at the place of production during an official inspections carried out at least monthly during the three months prior to export

Note *Amauromyza maculosa*, *Liriomyza huidobrensis*, *Liriomyza trifolii* and *Liriomyza sativae* are not known to occur in New Zealand

9. Plant genera and species regarded as being susceptible to *Phytophthora ramorum*

The plants shall be accompanied by a phytosanitary certificate. Which shall be issued when the consignment is officially inspected within 2 days before the certificate is issued. The consignment must have been found free from *Phytophthora ramorum* in this inspection. The inspection shall also include laboratory inspection of any suspicious specimens.

Additional declarations:

“Consignment complies with Annex 2, (a) of Regulations on measures against *Phytophthora ramorum*”

The plants originate in an area which, in accordance with ISPM no .4, there is an official statement that *Phytophthora ramorum* does not occur. The name of the area shall be mentioned in the certificate under the heading ‘Place of origin’ and shall have the above statement under the heading ‘Additional declarations’.

Or

“Consignment complies with Annex 2, (b) of Regulations on measures against *Phytophthora ramorum*”

No signs of *Phytophthora ramorum* have been observed on any susceptible plant at the place of production during official inspection, carried out at least twice at appropriate times when the plants are in active growth in the course of the last cycle of vegetation. The plants shall have been found free from *Phytophthora ramorum* in these inspections and by laboratory inspection of any suspicious specimens. The phytosanitary certificate shall have the above statement under the heading ‘Additional declarations’.

In addition to the additional declarations to be given on the phytosanitary certificate (a or b), the name of the place of production shall be stated under the heading ‘Place of origin’.

and

“Consignment complies with Annex 4A, point 10 of Regulations relating to plants and measures against pests”

The plants originate in an area where *Quadraspidiotus perniciosus* is not known to occur. The place of production has been under official monitoring since the beginning of the last two cycles of vegetation, and no signs of *Quadraspidiotus perniciosus* have been observed and

“Consignment complies with Annex 4A, point 11 (a) of Regulations relating to plants and measures against pests”

The plants originate in a country known to be free from *Monilinia fructicola*.

or

“Consignment complies with Annex 4A, point 11 (b) of Regulations relating to plants and measures against pests”

The plants originate in an area recognised as being free from *Monilinia fructicola*, and that no symptoms of *Monilinia fructicola* have been observed at the place of production since the beginning of the last complete cycle of vegetation.

and

“Consignment complies with Annex 4A, point 14 (a) of Regulations relating to plants and measures against pests”

The plants originate in areas known to be free from *Candidatus phytoplasma pyri*, according to International Standard for Phytosanitary Measures (ISPM) No 4, and the name of the area appears from the certificate from the column for additional declarations, or

“Consignment complies with Annex 4A, point 14 (b) of Regulations relating to plants and measures against pests”

i) plants at the place of production and in its immediate vicinity which have shown symptoms giving rise to the suspicion of contamination by *Candidatus phytoplasma pyri* have been rogued out at that place within the last three complete cycles of vegetation, and
ii) one per thousand of the plant material of the batch to be imported must be subjected to testing in the exporting country, using appropriate testing which also uncovers latent infections, and found to be free from *Candidatus phytoplasma pyri*. At least one sample must be tested if the consignment consists of less than one thousand units.

and

“Consignment complies with Annex 4A, point 38 (a) of Regulations relating to plants and measures against pests”

The plants originate in an area known to be free from *Erwinia amylovora* in accordance to International Standard for Phytosanitary Measures (ISPM) No 4. The name of the area shall be mentioned in the certificate under the additional declarations.

or

“Consignment complies with Annex 4A, point 38 (b) of Regulations relating to plants and measures against pests”

The plants have been produced in a buffer zone, or, if they have been moved into a buffer zone, they have as a minimum been kept and maintained during a period from 1 April to 31 October within the last complete cycle of vegetation, in a field:

i) - Situated at least one km within the border of an officially designated buffer zone of a minimum of 50 km², where host plants, during the last two complete cycles of vegetation, have been subjected to an officially approved and surveyed control system to minimise the risk of spread of *Erwinia amylovora* from plants growing there,

- When the buffer zone is established, official inspections shall be carried out within the part of the zone situated outside the production field and a 500 m wide zone around this, at least once after the beginning of the last complete cycle of vegetation, at the most appropriate period, and all host plants showing symptoms shall be rogued out at once. The results of these inspections shall be submitted to Norwegian Food Safety Authority before 1 May each year,

- A closer description of the buffer zone shall be available to Norwegian Food Safety Authority

- Name or other identification of the buffer zone shall be mentioned in the certificate under the additional declarations

and

ii) Which has been officially approved, in the same way as the buffer zone, within the last two complete cycles of vegetation, for growing plants, on the conditions appearing from point 38 b),

and

iii) Which, together with the surrounding zone of at least 500 m, has been found to be free from *Erwinia amylovora* since the beginning of the last complete cycle of vegetation, at official inspections that have been carried out at least:

- Twice in the field, at the most appropriate period, i.e. once within a period from June to August, and once within a period from August to November, and

- Once in the mentioned surrounding zone, at the most appropriate period, i.e. within a period from August to November,

and

iv) From which plants have been officially tested for latent infections in accordance with EPPO Diagnostic protocol for *Erwinia amylovora*, on samples officially drawn at the most appropriate period, and these are found to be free from this pest.

and

“Consignment complies with Annex 4A, point 20 (a) of Regulations relating to plants and measures against pests”

The plants are no more than third generation stock derived from material found to be from Chrysanthemum stunt viroid by means of virological tests, or directly derived from material of which a representative sample of at least 10% has been found to be free from Chrysanthemum stunt viroid at an official inspection at the time of flowering

and

“Consignment complies with Annex 4A, point 20 (b) of Regulations relating to plants and measures against pests”

The plants come from premises which have been officially inspected at least once a month during the three months prior to dispatch. No symptoms of *Puccinia horiana* were observed upon plants in the production area or within the immediate vicinity during the three months prior to export

or

The plants have undergone appropriate treatment for *Puccinia horiana*

and

“Consignment complies with Annex 4A, point 20 (c) of Regulations relating to plants and measures against pests”

The plants are derived in direct line from mother plants which were found free from *Erwinia chrysanthemi* pv. *chrysanthemi* by means of officially-approved tests carried out at least once within the last two years

and

“Consignment complies with Annex 4A, point 19.2 (a) of Regulations relating to plants and measures against pests”

No signs of *Spodoptera litura* have been observed at the place of production since the beginning of the last complete cycle of vegetation

or

“Consignment complies with Annex 4A, point 19.2 (b) of Regulations relating to plants and measures against pests”

The plants have undergone appropriate treatment to protect them from *Spodoptera litura* and

“Consignment complies with Annex 4A, point 19.1 (a) of Regulations relating to plants and measures against pests”

No signs of *Helicoverpa armigera* or *Spodoptera littoralis* have been observed at the place of production since the beginning of the complete cycle of vegetation

or

“Consignment complies with Annex 4A, point 19.1 (b) of Regulations relating to plants and measures against pests”

The plants have undergone appropriate treatment to protect them from *Helicoverpa armigera* or *Spodoptera littoralis*

and

“Consignment complies with Annex 4A, point 10 of Regulations relating to plants and measures against pests”

The plants originate in an area where *Quadraspidiotus perniciosus* is not known to occur. The place of production has been under official monitoring since the beginning of the last two cycles of vegetation, and no signs of *Quadraspidiotus perniciosus* have been observed and

“Consignment complies with Annex 4A, point 11 (a) of Regulations relating to plants and measures against pests”

The plants originate in a country known to be free from *Monilinia fructicola*.

or

“Consignment complies with Annex 4A, point 11 (b) of Regulations relating to plants and measures against pests”

The plants originate in an area recognised as being free from *Monilinia fructicola*, and that no symptoms of *Monilinia fructicola* have been observed at the place of production since the beginning of the last complete cycle of vegetation.

and

“Consignment complies with Annex 4A, point 12 of Regulations relating to plants and measures against pests”

No symptoms of *Phyllosticta solitaria* have been observed on plants at the place of production since the beginning of the last complete cycle of vegetation.

and

“Consignment complies with Annex 4A, point 13.1 (a) of Regulations relating to plants and measures against pests”

a) The plants are derived in direct line from material which is maintained under appropriate conditions and subjected, within the last three complete cycles of vegetation, at least once to official testing for *Cherry rasp leaf nepovirus* (American) and *Tomato ringspot nepovirus* by means of suitable indicators or equivalent methods, and were found to be free, in these tests, from these pests,

and

“Consignment complies with Annex 4A, point 13.1 (b) of Regulations relating to plants and measures against pests”

b) No symptoms of diseases caused by *Cherry rasp leaf nepovirus* (American) and *Tomato ringspot nepovirus* have been observed at the place of production or on susceptible plants in its immediate vicinity since the beginning of the last three complete cycles of vegetation.

and

“Consignment complies with Annex 4A, point 13.2 (a) of Regulations relating to plants and measures against pests”

a) The plants originate in areas known to be free from *Candidatus phytoplasma mali*, in accordance to International Standard for Phytosanitary Measures (ISPM) No 4. The name of the area shall be mentioned on the certificate under the additional declarations.

or

“Consignment complies with Annex 4A, point 13.2 (b) of Regulations relating to plants and measures against pests”

i) The plants (other than those raised from seeds) are derived in direct line from material which is maintained under appropriate conditions, and subjected, within the last six complete cycles of vegetation, at least once to official testing for *Candidatus phytoplasma mali* in the exporting country, using appropriate testing which also uncovers latent infections, and found to be free from this pest, and

- ii) That no symptoms of diseases caused by *Candidatus phytoplasma mali* have been observed at the place of production or on susceptible plants in its immediate vicinity since the beginning of the last three complete cycles of vegetation and
- iii) One per thousand of the plant material of the batch to be imported must be subjected to testing in the exporting country using appropriate testing which also uncovers latent infections, and found to be free from *Candidatus phytoplasma mali*. At least one sample must be tested if the consignment consist of less than one thousand units.

and

“Consignment complies with Annex 4A, point 17 of Regulations relating to plants and measures against pests”

No symptoms of non-European viruses and virus-like pathogens have been observed on plants at the place of production since the beginning of the last complete cycle of vegetation

and

“Consignment complies with Annex 4A, point 38 (a) of Regulations relating to plants and measures against pests”

The plants originate in an area known to be free from *Erwinia amylovora* in accordance to International Standard for Phytosanitary Measures (ISPM) No 4. The name of the area shall be mentioned in the certificate under the additional declarations.

or

“Consignment complies with Annex 4A, point 38 (b) of Regulations relating to plants and measures against pests”

The plants have been produced in a buffer zone, or, if they have been moved into a buffer zone, they have as a minimum been kept and maintained during a period from 1 April to 31 October within the last complete cycle of vegetation, in a field:

i) -Situated at least one km within the border of an officially designated buffer zone of a minimum of 50 km², where host plants, during the last two complete cycles of vegetation, have been subjected to an officially approved and surveyed control system to minimise the risk of spread of *Erwinia amylovora* from plants growing there,

- When the buffer zone is established, official inspections shall be carried out within the part of the zone situated outside the production field and a 500 m wide zone around this, at least once after the beginning of the last complete cycle of vegetation, at the most appropriate period, and all host plants showing symptoms shall be rogued out at once. The results of these inspections shall be submitted to Norwegian Food Safety Authority before 1 May each year,

- A closer description of the buffer zone shall be available to Norwegian Food Safety Authority

- Name or other identification of the buffer zone shall be mentioned in the certificate under the additional declarations

and

ii) Which has been officially approved, in the same way as the buffer zone, within the last two complete cycles of vegetation, for growing plants, on the conditions appearing from point 38 b),

and

iii) Which, together with the surrounding zone of at least 500 m, has been found to be free from *Erwinia amylovora* since the beginning of the last complete cycle of vegetation, at official inspections that have been carried out at least:

- Twice in the field, at the most appropriate period, i.e. once within a period from June to August, and once within a period from August to November, and

- Once in the mentioned surrounding zone, at the most appropriate period, i.e. within a period from August to November,

and

iv) From which plants have been officially tested for latent infections in accordance with EPPO Diagnostic protocol for *Erwinia amylovora*, on samples officially drawn at the most appropriate period, and these are found to be free from this pest.

and

“Consignment complies with Annex 4A, point 10 of Regulations relating to plants and measures against pests”

The plants originate in an area where *Quadraspidiotus perniciosus* is not known to occur. The place of production has been under official monitoring since the beginning of the last two cycles of vegetation, and no signs of *Quadraspidiotus perniciosus* have been observed and

“Consignment complies with Annex 4A, point 11 (a) of Regulations relating to plants and measures against pests”

The plants originate in a country known to be free from *Monilinia fructicola*.

or

“Consignment complies with Annex 4A, point 11 (b) of Regulations relating to plants and measures against pests”

The plants originate in an area recognised as being free from *Monilinia fructicola*, and that no symptoms of *Monilinia fructicola* have been observed at the place of production since the beginning of the last complete cycle of vegetation.

and

“Consignment complies with Annex 4A, point 12 of Regulations relating to plants and measures against pests”

No symptoms of *Phyllosticta solitaria* have been observed on plants at the place of production since the beginning of the last complete cycle of vegetation.

and

“Consignment complies with Annex 4A, point 17 of Regulations relating to plants and measures against pests”

No symptoms of non-European viruses and virus-like pathogens have been observed on plants at the place of production since the beginning of the last complete cycle of vegetation

and

“Consignment complies with Annex 4A, point 38 (a) of Regulations relating to plants and measures against pests”

The plants originate in an area known to be free from *Erwinia amylovora* in accordance to International Standard for Phytosanitary Measures (ISPM) No 4. The name of the area shall be mentioned in the certificate under the additional declarations.

or

“Consignment complies with Annex 4A, point 38 (b) of Regulations relating to plants and measures against pests”

The plants have been produced in a buffer zone, or, if they have been moved into a buffer zone, they have as a minimum been kept and maintained during a period from 1 April to 31 October within the last complete cycle of vegetation, in a field:

i) -Situated at least one km within the border of an officially designated buffer zone of a minimum of 50 km², where host plants, during the last two complete cycles of vegetation,

have been subjected to an officially approved and surveyed control system to minimise the risk of spread of *Erwinia amylovora* from plants growing there,

- When the buffer zone is established, official inspections shall be carried out within the part of the zone situated outside the production field and a 500 m wide zone around this, at least once after the beginning of the last complete cycle of vegetation, at the most appropriate period, and all host plants showing symptoms shall be rogued out at once. The results of these inspections shall be submitted to Norwegian Food Safety Authority before 1 May each year,

- A closer description of the buffer zone shall be available to Norwegian Food Safety Authority

- Name or other identification of the buffer zone shall be mentioned in the certificate under the additional declarations

and

- ii) Which has been officially approved, in the same way as the buffer zone, within the last two complete cycles of vegetation, for growing plants, on the conditions appearing from point 38 b),

and

- iii) Which, together with the surrounding zone of at least 500 m, has been found to be free from *Erwinia amylovora* since the beginning of the last complete cycle of vegetation, at official inspections that have been carried out at least:

- Twice in the field, at the most appropriate period, i.e. once within a period from June to August, and once within a period from August to November, and

- Once in the mentioned surrounding zone, at the most appropriate period, i.e. within a period from August to November,

and

- iv) From which plants have been officially tested for latent infections in accordance with EPPO Diagnostic protocol for *Erwinia amylovora*, on samples officially drawn at the most appropriate period, and these are found to be free from this pest.

Sunflower

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Hordeum vulgare

Barley

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Lycopersicon esculentum

Tomato

Conditions:

Plant import permit not required. Phytosanitary certificate and additional declaration required.

Additional declaration:

“Consignment complies with Annex 4A, point 33 of Regulations relating to plants and measures against pests”

The seeds have been obtained by a suitable acid extraction method or an alternative equivalent method
and

“Consignment complies with Annex 4A, point 33 (a) of Regulations relating to plants and measures against pests”

The seeds originate in an area which *Clavibacter michiganensis michiganensis*, *Xanthomonas vesicatoria* and Potato spindle tuber viroid are not known to occur
or

“Consignment complies with Annex 4A, point 33 (b) of Regulations relating to plants and measures against pests”

No symptoms of diseases caused by *Clavibacter michiganensis michiganensis*, *Xanthomonas vesicatoria* and Potato spindle tuber viroid have been observed on the plants at the place of production since the last complete cycle of vegetation
or

“Consignment complies with Annex 4A, point 33 (c) of Regulations relating to plants and measures against pests”

A representative sample of seeds have been subjected to official testing for *Clavibacter michiganensis michiganensis*, *Xanthomonas vesicatoria* and Potato spindle tuber viroid using appropriate methods and were found to be free from these pests

Medicago sativa

Lucerne (Alfalfa)

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Oryza sativa

Rice

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Phaseolus spp.

Bean

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Trifolium spp.

Clover

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Triticum spp.

Wheat

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

Zea mays

Maize

Conditions:

Plant import permit not required. Phytosanitary certificate not required.

4.4.2 Seed for Consumption

Refer Section 3.4.2

4.4.3 Seed for Processing

Refer Section 3.4.3

4.5 Growing Media

Bark

Conditions:

Plant import permit not required. Phytosanitary certificate and additional declaration required.

Additional declaration

“Consignment complies with Annex 4A, point 36 of Regulations relating to plants and measures against pests”

The place of production is known to be free from *Clavibacter michiganensis* ssp. *sependonicus*, *Globodera pallida*, *Globodera rostochiensis*, *Phytophthora fragariae* var. *fragariae*, *Ralstonia solanacearum* and *Synchytrium endobioticum*

Compost

Conditions:

Plant import permit not required. Phytosanitary certificate and additional declaration required.

Additional declaration

“Consignment complies with Annex 4A, point 36 of Regulations relating to plants and measures against pests”

The place of production is known to be free from *Clavibacter michiganensis* ssp. *sependonicus*, *Globodera pallida*, *Globodera rostochiensis*, *Phytophthora fragariae* var. *fragariae*, *Ralstonia solanacearum* and *Synchytrium endobioticum*

Peat

Conditions:

Plant import permit not required. Phytosanitary certificate and additional declaration required.

Additional declaration

“Consignment complies with Annex 4A, point 36 of Regulations relating to plants and measures against pests”

The place of production is known to be free from *Clavibacter michiganensis* ssp. *sependonicus*, *Globodera pallida*, *Globodera rostochiensis*, *Phytophthora fragariae* var. *fragariae*, *Ralstonia solanacearum* and *Synchytrium endobioticum*

Appendix 1. Quarantine Pests as notified by Norway

| PEST TYPE | ORDER | FAMILY | GENUS | SPECIES | SYNONYM | COMMON NAME |
|-------------------|-------------------|--------------------|---------------------|---|-------------------------------------|--|
| Arachnid | Acarida (mites) | Eriophyidae | <i>Aculops</i> | <i>Aculops fuchsiae</i> | | fuschsia gall mite |
| Bacterial disease | Acholeplasmatales | Acholeplasmataceae | <i>Phytoplasma</i> | <i>Apple proliferation phytoplasma</i> | <i>Phytoplasma mali</i> | |
| | | | | <i>Elm phloem necrosis phytoplasma</i> | <i>Phytoplasma ulmi</i> | |
| | | | | <i>Peach X disease phytoplasma</i> | <i>Phytoplasma pruni</i> | |
| | | | | <i>Pear decline phytoplasma</i> | <i>Phytoplasma pyri</i> | |
| | | | | <i>Potato stolbur phytoplasma</i> | <i>Phytoplasma solani</i> | |
| | | | | <i>Strawberry witches' broom phytoplasma</i> | | |
| | Actinomycetales | Microbacteriaceae | <i>Clavibacter</i> | <i>Clavibacter michiganensis subsp. michiganensis</i> | <i>Corynebacterium michiganense</i> | |
| | | | | <i>Clavibacter michiganensis subsp. sepedonicus</i> | <i>Corynebacterium sepedonicum</i> | bacterial ring rot |
| | Burkholderiales | Burkholderiaceae | <i>Burkholderia</i> | <i>Burkholderia caryophylli</i> | <i>Pseudomonas caryophylli</i> | bacterial stem crack of carnation, bacterial wilt of carnation |
| | | | <i>Ralstonia</i> | <i>Ralstonia solanacearum</i> | <i>Pseudomonas solanacearum</i> | bacterial wilt |
| | Enterobacteriales | Enterobacteriaceae | <i>Dickeya</i> | <i>Erwinia chrysanthemi</i> pv. <i>chrysanthemi</i> | | |
| | | | | <i>Erwinia chrysanthemi</i> pv. <i>dianthicola</i> | <i>Dickeya dianthicola</i> | |
| | | | <i>Erwinia</i> | <i>Erwinia amylovora</i> | | fireblight, twig blight of apple |

| | | | | | | |
|--------------------------|------------------|--------------------|-----------------------|---|--|--|
| Bacterial disease | Xanthomonadales | Xanthomonadaceae | <i>Xanthomonas</i> | <i>Xanthomonas arboricola</i> pv. <i>pruni</i> | <i>Xanthomonas campestris</i> pv. <i>Pruni</i> | stonefruit fruit spot |
| | | | | <i>Xanthomonas axonopodis</i> pv. <i>dieffenbachiae</i> | | |
| | | | | <i>Xanthomonas fragariae</i> | | angular leaf spot of strawberry, leaf blight of strawberry |
| | | | | <i>Xanthomonas vesicatoria</i> | <i>Xanthomonas vesicatoria</i> | bacterial scab |
| Chromista | Peronosporales | Peronosporaceae | <i>Phytophthora</i> | <i>Phytophthora fragariae</i> | | Lanarkshire disease of strawberry |
| | | | | <i>Phytophthora ramorum</i> | | sudden oak death |
| | | | | <i>Phytophthora rubi</i> | | |
| Flatworm | Seriata | Geoplanidae | <i>Arthurdendyus</i> | <i>Arthurdendyus triangulatus</i> | <i>Artioposthia triangulata</i> | New Zealand flatworm |
| Fungal disease | Botryosphaerales | Botryosphaeriaceae | <i>Botryosphaeria</i> | <i>Botryosphaeria larinia</i> | <i>Guignardia larinia</i> | shoot blight of larch, twig die-back of larch |
| | | Phyllostictaceae | <i>Phyllosticta</i> | <i>Phyllosticta solitaria</i> | | blotch of apple |
| | Capnodiales | Mycosphaerellaceae | <i>Dothistroma</i> | <i>Mycosphaerella pini</i> | <i>Dothistroma septosporum</i> | blight of pine |
| | | | <i>Lecanosticta</i> | <i>Mycosphaerella dearnessii</i> | <i>Lecanosticta acicola</i> | brown spot of pine |
| | | | <i>Mycosphaerella</i> | <i>Mycosphaerella gibsonii</i> | <i>Cercoseptoria pini-densiflorae</i> | brown needle blight of pine, cercospora blight of pine |
| | | | | <i>Mycosphaerella larinis-leptolepidis</i> | | needle cast of Japanese larch |
| | | | <i>Septoria</i> | <i>Septoria lycopersici</i> var. <i>malagutii</i> | <i>Septoria malagutii</i> | blight of tomato |
| | | | <i>Sphaerulina</i> | <i>Mycosphaerella populorum</i> | <i>Sphaerulina musiva</i> | Septoria canker of poplar |
| | | | | | | |

| | | | | | | |
|----------------|-----------------------|-------------------|-------------------------|---------------------------------|----------------------------------|--|
| Fungal disease | Chaetothyriomycetidae | Chaetothyriales | <i>Phialophora</i> | <i>Phialophora cinerescens</i> | | phialophora wilt of carnation |
| | Chytridiales | Synchytriaceae | <i>Synchytrium</i> | <i>Synchytrium endobioticum</i> | | black scab of potato, black wart of potato, wart disease of potato |
| | Diaporthales | Cryphonectriaceae | <i>Cryphonectria</i> | <i>Cryphonectria parasitica</i> | <i>Endothia parasitica</i> | blight of chestnut |
| | | Diaporthaceae | <i>Diaporthe</i> | <i>Diaporthe vaccinii</i> | | blight of blueberry, fruit rot of blueberry, phomopsis canker and dieback of blueberry |
| | Helotiales | Dermateaceae | <i>Atropellis</i> | <i>Atropellis spp.</i> | | branch canker of pine, trunk canker of pine, twig blight of pine |
| | | Sclerotiniaceae | <i>Monilinia</i> | <i>Monilinia fructicola</i> | | brown rot |
| | | | <i>Stromatinia</i> | <i>Sclerotium cepivorum</i> | <i>Stromatinia cepivora</i> | white rot |
| | Hymenochaetales | Hymenochaetaceae | <i>Coniferiporia</i> | <i>Phellinus weirii</i> | <i>Coniferiporia weirii</i> | laminated butt rot of conifers |
| | Microascales | Ceratocystidaceae | <i>Ceratocystis</i> | <i>Ceratocystis fagacearum</i> | | oak wilt, wilt of oak |
| | Ophiostomatales | Ophiostomataceae | <i>Ophiostoma</i> | <i>Ophiostoma wagneri</i> | <i>Ceratocystis wagneri</i> | black stain root disease of conifers; wilt of conifers |
| | Pleosporales | Didymellaceae | <i>Stagonosporopsis</i> | <i>Phoma andina</i> | <i>Stagonosporopsis andigena</i> | black blight of potato |
| | | Pleosporaceae | <i>Alternaria</i> | <i>Alternaria mali</i> | <i>Alternaria alternata</i> | alternaria blotch of apple |

| | | | | | | |
|--|--|--------------|--------------------|----------------------------|---------------------------|---|
| | | Venturiaceae | <i>Apiosporina</i> | <i>Apiosporina morbosa</i> | <i>Dibotryon morbosum</i> | black knot of cherry, black knot of plum, black knot of stone fruits |
|--|--|--------------|--------------------|----------------------------|---------------------------|---|

| | | | | | | |
|----------------|-------------------------------|-----------------|------------------------|------------------------------------|--------------------------|---|
| Fungal disease | Pucciniales | Coleosporiaceae | <i>Chrysomyxa</i> | <i>Chrysomyxa arctostaphyli</i> | | broom rust of spruce, common yellow witches' broom rust |
| | | Cronartiaceae | <i>Cronartium</i> | <i>Cronartium</i> spp. | | Stalactiform blister rust |
| | | | <i>Endocronartium</i> | <i>Endocronartium</i> spp. | | pine-to-pine gall rust, western gall rust of pine |
| | | Melampsoraceae | <i>Melampsora</i> | <i>Melampsora farlowii</i> | | rust of hemlock; rust of tsuga |
| | | | | <i>Melampsora medusae</i> | | conifer/poplar rust, leaf rust of poplar |
| | | Pucciniaceae | <i>Gymnosporangium</i> | <i>Gymnosporangium</i> spp. | | rust of apple |
| | | | <i>Puccinia</i> | <i>Puccinia horiana</i> | | white rust |
| | | | | <i>Puccinia pelargonii-zonalis</i> | | rust of pelargonium |
| | | | | <i>Puccinia pittieriana</i> | | common rust |
| | Tilletiales | Tilletiaceae | <i>Tilletia</i> | <i>Tilletia indica</i> | <i>Neovossia indica</i> | Indian bunt of wheat, karnal bunt of wheat, partial bunt of wheat |
| | Ustilaginales | Glomosporiaceae | <i>Thecaphora</i> | <i>Thecaphora solani</i> | <i>Angiosorus solani</i> | potato smut |
| Insect | Coleoptera (beetles, weevils) | Buprestidae | <i>Agrilus</i> | <i>Agrilus anxius</i> | | bronze birch borer |
| | | | | <i>Agrilus planipennis</i> | | emerald ash borer |
| | | Cerambycidae | <i>Anoplophora</i> | <i>Anoplophora chinensis</i> | | citrus longhorn |
| | | | | <i>Anoplophora glabripennis</i> | | Asian long-horned beetle, basicosta white-spotted longicorn beetle, starry sky beetle |
| | | | <i>Monochamus</i> | <i>Monochamus</i> spp. | | |

| | | | | | | |
|--------|--|---------------|------------------------|------------------------------------|----------------------------|--|
| Insect | Coleoptera (beetles, weevils) | Chrysomelidae | <i>Leptinotarsa</i> | <i>Leptinotarsa decemlineata</i> | | ten-lined potato beetle |
| | | Curculionidae | <i>Conotrachelus</i> | <i>Conotrachelus nenuphar</i> | | plum curculio |
| | | | <i>Pissodes</i> | <i>Pissodes</i> spp. | | Northern pine weevil |
| | | | <i>Premnotrypes</i> | <i>Premnotrypes</i> spp. | | Andean potato weevil |
| | | Scarabaeidae | <i>Blitopertha</i> | <i>Blitopertha orientalis</i> | <i>Anomala orientalis</i> | Asiatic beetle, oriental beetle, spotted chafer |
| | | | <i>Popillia</i> | <i>Popillia japonica</i> | | Japanese beetle |
| | Diptera (flies) | Agromyzidae | <i>Liriomyza</i> | <i>Liriomyza huidobrensis</i> | | pea leaf miner |
| | | | | <i>Liriomyza sativae</i> | | cabbage leaf miner |
| | | | | <i>Liriomyza trifolii</i> | | American serpentine leaf miner |
| | | | <i>Nemorimyza</i> | <i>Amauromyza maculosa</i> | <i>Nemorimyza maculosa</i> | chrysanthemum leaf miner |
| | | Tephritidae | <i>Rhagoletis</i> | <i>Rhagoletis cingulata</i> | | cherry maggot, eastern cherry fruit fly |
| | | | | <i>Rhagoletis fausta</i> | | black cherry fruit fly, dark cherry fruit fly |
| | | | | <i>Rhagoletis indifferens</i> | | western cherry fruit fly |
| | | | | <i>Rhagoletis mendax</i> | | blueberry fruit fly |
| | | | | <i>Rhagoletis pomonella</i> | | apple maggot |
| | Hemiptera (aphids, scale, stink bugs) | Aleyrodidae | <i>Bemisia</i> | <i>Bemisia tabaci</i> | | silver white fly |
| | | Aphididae | <i>Chaetosiphon</i> | <i>Chaetosiphon fragaefolii</i> | | strawberry aphid |
| | | | <i>Eriosoma</i> | <i>Eriosoma lanigerum</i> | | American blight, apple woolly aphid, elm rosette aphid |
| | | Diaspididae | <i>Quadraspidiotus</i> | <i>Quadraspidiotus perniciosus</i> | | San Jose scale |

|--------|--|--------------|-----------------------|---------------------------------|---|--|
| Insect | Lepidoptera (butterflies, moths) | Noctuidae | <i>Helicoverpa</i> | <i>Helicoverpa armigera</i> | <i>Heliothis armigera</i> | corn earworm |
| | | | <i>Spodoptera</i> | <i>Spodoptera littoralis</i> | | cotton leafworm |
| | | | | <i>Spodoptera litura</i> | | cluster caterpillar, cotton leafworm, cotton worm |
| | | Tineidae | <i>Opogona</i> | <i>Opogona sacchari</i> | | banana moth, sugarcane borer, sugarcane moth |
| | | Tortricidae | <i>Acleris</i> | <i>Acleris gloverana</i> | | western black-headed bud worm |
| | | | | <i>Acleris variana</i> | | eastern black-headed budworm, hemlock budworm |
| | | | <i>Cacoecimorpha</i> | <i>Cacoecimorpha pronubana</i> | | carnation leaf roller, carnation tortrix, carnation tortrix moth |
| | | | <i>Epichoristodes</i> | <i>Epichoristodes acerbella</i> | | carnation worm, South African carnation tortrix |
| | | | <i>Grapholita</i> | <i>Cydia prunivora</i> | <i>Grapholita prunivora</i> | lesser apple worm, plum moth |
| | | | | | | |
| | Thysanoptera (thrips) | Thripidae | <i>Thrips</i> | <i>Thrips palmi</i> | | oriental thrips, palm thrips, southern yellow thrips |
| | Dorylaimida | Longidoridae | <i>Xiphinema</i> | <i>Xiphinema americanum</i> | <i>Xiphinema americanum sensu stricto</i> | American dagger nematode |
| | | | | <i>Xiphinema californicum</i> | | |
